

PRAVEENSANKAR MANIMARAN

PROFILE

Praveensankar Manimaran has completed his PhD in Computer Science at the University of Oslo, Norway. Praveen has previously worked as a Research and Engineering Scientist at Zoho, India. Praveen has experience in Applied Artificial Intelligence, Large Language Models, and Privacy-Preserving Systems.

PROFESSIONAL EXPERIENCE

- Research and Engineering Scientist**, *Zoho Corporation Pvt. Ltd.*, Chennai **Dec 2025 – Jul 2026**
 - Developed AI-agent-based solutions built on multimodal LLMs to process and analyse heterogeneous data, including text and other unstructured modalities.
 - Fine-tuned a pretrained multimodal LLM (Qwen3-VL) on a local dataset using LORA approach.
 - This protocol automated the manual system used to analyse customer feedback.
 - Wrote two patent applications detailing the architecture.
 - Technologies used: LangChain, HuggingFace, Pinecone, PEFT
- Research Fellow**, *University of Oslo*, Norway **Oct 2020 – Sep 2024**
 - Responsible for the deployment and maintenance of Norway's EBSI pilot node.
 - Worked as a teaching assistant for Distributed Systems, Distributed Blockchain Technologies, and Computer Networks courses.
- Software Engineer**, *Accolite Software India Pvt. Ltd.*, Bengaluru, India **Jul 2016 – Mar 2017**
 - Worked on web development using technologies associated with the .NET framework.

EDUCATION

- PhD in Computer Science**, *University of Oslo*, Oslo, Norway **Oct 2020 – Mar 2026**
- M.Tech.**, *National Institute of Technology Puducherry*, Karaikal, India **Jul 2018 – Jun 2020**
 - Gold Medalist
- B.E.**, *PSG College of Technology*, Coimbatore, India **Jul 2012 – May 2016**

AREAS OF EXPERTISE

- Applied AI
- Large Language Models
- Generative AI
- Research

TECHNICAL PROFICIENCIES

Languages: Python, Golang **Frameworks:** PyTorch, Hugging Face, LangChain

PATENTS

- System and Method for Processing Heterogeneous Data using Multimodal Large Language Models. 2026.** (Patent Pending)
- System and Method for Processing Documents using Large Language Models. 2026.** (Patent Pending)

PUBLICATIONS

- zkRevoke: Configurable Untraceability for Verifiable Credentials using ZKPs** (2026 Proceedings on Privacy Enhancing Technologies)
- Decentralization Trends in Identity Management: From Federated to Self-Sovereign Identity Management Systems** (2025 Computer Science Review)
- Prevoke: Privacy-Preserving Configurable Method for Revoking Verifiable Credentials** (2024 IEEE International Conference on Blockchain)
